

# Smart Lock 004

## Wireless Bluetooth keyboard

### Product diagram

### Specifications

|                   |                        |                                                                                                     |
|-------------------|------------------------|-----------------------------------------------------------------------------------------------------|
| Product Parameter | Method of installation | Vertical plate, wall-mounted installation                                                           |
|                   | Operating environment  | Outdoor                                                                                             |
|                   | Applicable to          | Family and individual users                                                                         |
|                   | Guiding light          | Keyboard three-color backlight                                                                      |
|                   | Voice ability          | Built-in buzzer                                                                                     |
|                   | Install compatibility  | Support back glue and screw installation, can be installed on the door frame, exterior wall or door |
|                   | Colour                 | Black                                                                                               |
|                   | Usage                  | Cooperate with other smart locks of Cool Code                                                       |

|                                          |                             |                                                                                                        |
|------------------------------------------|-----------------------------|--------------------------------------------------------------------------------------------------------|
| Electrical /<br>mechanical<br>parameters | Product size                | 56 * 142.5 * 24 mm                                                                                     |
|                                          | Product material            | PC flame-retardant plastic                                                                             |
|                                          | Surface preparation         | Texturing                                                                                              |
|                                          | Configuration mode          | Mobile Application Configuration                                                                       |
|                                          | Product weight              | The bare machine weighs 130g                                                                           |
|                                          | Working voltage             | 6V                                                                                                     |
|                                          | Power supply mode           | Battery-powered, 4 AAA batteries                                                                       |
| Function /<br>performance<br>parameters  | Ability to communicate      | Support for Bluetooth LE 5.3, Bluetooth LE 1Mbps, 2Mbps, Long Range S2 (500 Kbps), S8 (125Kbps),2.4Ghz |
|                                          | Key mapping                 | The 12 keys, including 0-9、√、Lock key                                                                  |
|                                          | Touch induction             | Supportive                                                                                             |
|                                          | Password number             | 6                                                                                                      |
|                                          | Endurance                   | 6 months                                                                                               |
|                                          | Fake PIN code               | No                                                                                                     |
| Environmental<br>parameter               | Working temperature         | -25℃-70℃                                                                                               |
|                                          | Storage temperature         | -40℃-85℃                                                                                               |
